Vol. 163, Nos. 1–4

Research Papers

Systematics of three-component, pseudo-binary mixing lines in 2D isotope ratio space representations and implications for mantle plume–ridge interaction
J. Douglass and J.-G. Schilling 1

Carbon dioxide mediated dissolution of Ca-feldspar: implications for silicate weathering
A. Berg and S.A. Banwart 25

A new equation of state for correlation and prediction of standard molal thermodynamic properties of aqueous species at high temperatures and pressures
J. Sedlbauer, J.P. O'Connell and R.H. Wood 43

Trace element fractionation during dehydration of eclogites from high-pressure terranes and the implications for element fluxes in subduction zones
H. Becker, K.P. Jochum and R.W. Carlson 65

Distribution of organic and inorganic phosphorus compounds in marine and lacustrine sediments: a ^{31}P NMR study
R. Carman, G. Edlund and C. Damberg 101

X-ray photoelectron spectroscopic measurement of the temperature dependence of leaching of cations from the albite surface
Y. Chen, S.L. Brantley and E.S. Ilton 115

Influence of Mg^{2+} on the kinetics of calcite precipitation and calcite crystal morphology
Y. Zhang and R.A. Dawe 129

Determination of natural Cu-isotope variation by plasma-source mass spectrometry: implications for use as geochemical tracers
X.K. Zhu, R.K. O'Nions, Y. Guo, N.S. Belshaw and D. Rickard 139

An X-ray absorption fine structure spectroscopy study of germanium-organic ligand complexes in aqueous solution
G.S. Pokrovski, F. Martin, J.-L. Hazemann and J. Schott 151

Are highly siderophile elements (PGE, Re and Au) fractionated in the upper mantle of the earth? New results on peridotites from Zabargad
G. Schmidt, H. Palme, K.-L. Kratz and G. Kurat 167

Mineralogy, crystallinity and stable isotopic composition of illitic clays within the Polish Zechstein basin: implications for the genesis of Kupferschiefer mineralization
A. Bechtel, Y.-N. Shieh, W.C. Elliott, S. Oszczepalski and S. Hoernes 189

Contrasting behaviour of Nb/Ta and Zr/Hf ratios in a peraluminous granitic pluton (Nova Scotia, Canada)
J. Dostal and A.K. Chatterjee 207

Sulfur diagenesis and partitioning in Holocene Peru shelf and upper slope sediments
N.S. Suits and M.A. Arthur 219

Meta-gabbro weathering in the Georgia Piedmont, USA: implications for global silicate weathering rates
P.A. Schroeder, N.D. Melear, L.T. West and D.A. Hamilton 235

The Broadlands–Ohaaki geothermal system, New Zealand. Part 1. Strontium isotope distribution in well BrO-29
S. Grimes, D. Rickard, C. Hawkesworth, P. van Calsteren and P. Browne 247

Isotope Geoscience Section

Improved U–Th–total Pb dating of zircons by electron microprobe using a simple new background modeling procedure and Ca as a chemical criterion of fluid-induced U–Th–Pb discordance in zircon
T. Geisler and H. Schleicher 269

New evidence for the origin of hypersaline pore fluids in the Mediterranean basin
A. Vengosh, J. Gieskes and C. Mahn 287
Inter-laboratory and other errors in Pb isotope analyses investigated using a ^{207}Pb–^{204}Pb double spike
M.F. Thirlwall 299
